📖 **Read the passage carefully and choose the letter of the correct answer.**

The Impact of Technology on Our Lives

Technology has become an essential part of our daily lives. From smartphones to computers, technology connects us to the world in ways that were once unimaginable. One of the biggest changes is the way we communicate. With the internet, we can send messages, make video calls, and connect with people from different parts of the world instantly. Social media platforms like Instagram, Facebook, and Twitter have also made it easier for people to stay in touch and share their lives. However, as technology continues to advance, it brings both positive and negative effects. On the one hand, it has made life more convenient, allowing us to do things like shop online, work from home, and access information with a simple click. On the other hand, overuse of technology can lead to health problems such as eye strain and poor posture, as well as social isolation.

Education is another area where technology has made a significant impact. Online learning has become more popular, especially during the global pandemic. Many schools now offer virtual classrooms where students can attend lessons, complete assignments, and even take exams from home. This flexibility has made education more accessible, particularly for students who live far from schools or have health issues. Additionally, technology has helped teachers by providing new tools for teaching, such as interactive whiteboards, educational apps, and digital textbooks. These innovations make learning more engaging and interactive. However, there are challenges too, like the digital divide. Not all students have access to the internet or modern devices, which can create inequality in education.

In the workforce, technology has revolutionized industries and created new job opportunities. Jobs that didn't exist a few decades ago, like app developers and social media managers, are now in high demand. Technology has also made many tasks easier and more efficient. For example, automation in factories allows products to be made faster and with fewer errors. In healthcare, medical technologies like MRI machines and telemedicine are improving patient care and diagnosis. However, some jobs have been replaced by machines, leading to concerns about unemployment. As technology continues to evolve, it is essential for individuals to adapt and learn new skills to remain competitive in the job market.

Part 1:

📖 **Write "True" if the statement is correct and "False" if it is not.**

Q1: _____ Technology has made it easier for people to communicate across the world.

Q2: _____ Social media platforms like Instagram, Facebook, and Twitter are harmful and make it harder for people to stay in touch.

Q3: _____ Online learning became more popular during the global pandemic.

Q4: _____ Not all students have access to the internet, which can lead to inequality in education.

Q5: _____ Technology has made many tasks in the workforce more time-consuming.

Part 2:

📖 Answer the following questions in complete sentences.

Q6: What is one positive impact of technology on communication?

_____

_____

_____

Q7: How has technology affected education during the global pandemic?

_____

_____

_____

Q8: Name one tool that teachers can use to enhance learning, as mentioned in the article.

_____

_____

_____

Q9: What is one challenge related to technology in education?

_____

_____

_____

Q10: **How has technology impacted the workforce and created new job opportunities?**

_____

_____

_____

✅ **Right Answers**

Part 1:

📖 **Write "True" if the statement is correct and "False" if it is not.**

Q1: _____True_____ **Technology has made it easier for people to communicate across the world.**

Q2: _____False_____ **Social media platforms like Instagram, Facebook, and Twitter are harmful and make it harder for people to stay in touch.**

Q3: _____True_____ **Online learning became more popular during the global pandemic.**

Q4: _____True_____ **Not all students have access to the internet, which can lead to inequality in education.**

Q5: _____False_____ **Technology has made many tasks in the workforce more time-consuming.**

Part 2:

📖 Answer the following questions in complete sentences.

Q6: **What is one positive impact of technology on communication?**

One positive impact of technology on communication is that it allows

people to connect with others instantly through the internet, via

messages, video calls, and social media platforms.

Q7: **How has technology affected education during the global pandemic?**

During the global pandemic, technology made education more accessible

by allowing online learning, where students could attend virtual

classrooms, complete assignments, and take exams from home.

Q8: **Name one tool that teachers can use to enhance learning, as mentioned in the article.**

One tool that teachers can use to enhance learning is interactive

whiteboards.

Q9: **What is one challenge related to technology in education?**

One challenge related to technology in education is the digital divide,

where not all students have access to the internet or modern devices,

leading to inequality.

Q10: **How has technology impacted the workforce and created new job opportunities?**

Technology has created new job opportunities, such as app developers and social media managers, and has made many tasks in industries more efficient, such as automation in factories and medical technologies in healthcare.
